# 1 Introduction

This document describes the update procedure and precautions for Fleekdrive Desktop (Ver.3.0.0) released on June 13, 2020.

This document is the update procedure from Ver1.0.4.

If you are using Ver.1.0.4 or earlier, please upgrade to 1.0.4 and execute the procedure in this document, or uninstall it and use Ver.3.0.0.

\* It will be Ver.3.0.0 according to the version of Fleekdrive.

# 2 Update procedure for Windows version

#### 2.1 Exit the Fleekdrive Desktop once

From the task tray, right-click the Fleekdrive Desktop icon and select "Quit Fleekdrive Desktop" to exit the currently running Desktop app once.

# Figure 2-1

2.2 Running the Desktop app as administrator

Right-click on Fleekdrive Desktop from the Start menu and select More > Run as administrator.

\* If you do not have local administrator privileges, you will be prompted to log in with an administrator account.

Please log in with an administrator account.

Updating Fleekdrive Desktop	
	Close

When the screen in Figure 2-6 disappears, restart your PC.

\* Please note that the upgrade will not be completed until the PC is restarted.

#### 3 Update procedure for Mac version

3.1 Exit the Fleekdrive Desktop once

From the task tray, right-click the Fleekdrive Desktop icon and select "Quit Fleekdrive Desktop" to exit the currently running Desktop app once.

#### Figure 3-1

#### 3.2 Rewrite icons folder

Rewriting is required to display the icon.

Access the following URL, download and unzip the zip file, and execute the shell (copy\_icons\_V3\_0\_0\_FDDesktop.sh).

https://appdl.fleekdrive.com/sd/RwfH2Ir63BRG3BmNMh8AbZpds9KZG0iw

If the shell cannot be executed by double-clicking, execute the following in the terminal.

cd (decompressed folder)

sh copy\_icons\_V3\_0\_0\_FDDesktop.sh

\* (decompressed folder) part contains the folder path after decompression.

When Drag and drop the unzipped folder to the terminal, the folder path will be entered automatically.

The figure below shows an example for unzipped a folder on the desktop of PC.

\* The actual Path will be V3\_0\_0.

#### Figure 3-2

When the shell is successfully executed, "success!" is displayed as shown below.
