Functional Improve(OnlineEdit)

No	Functions	Fixes
1	ALL	80% reduction in opening time if opened immediately after uploading
2	SpreadSheet	Modified Auto SUM specifications to be the same as Excel
3	SpreadSheet	Modified to be able to select the range of cells at the time of function input with the keyboard

Bug Fixes

No	Functions	Fixes
1	Files	The tree order is incorrect
2	Files	You can print from the browser even if you do not have download permission
3	Files	Incorrect translation of "移動・コピー先のスペースのアクセス権限を適用" in space move / copy destination selection modal
4	Files	List is blank when sorted by path in trash
5	Files	Deleting a file space in a space and then deleting the parent space of that space leaves the contents empty but leaves the parent space
6	Files	Delete button is displayed even though you do not have the right to delete shortcuts
7	Files	In case of Edge, scroll bar is displayed in the title of LightNavi
8	Files	If you select the file and space together when moving or copying, you can put the file directly under the networking space
9	Files	When converting to PDF with tags or favorites, the space that is displayed after that becomes the space that was displayed immediately before
10	Search	Search may not work even if the target file exists
11	File delivery	File name is garbled when you "download" the file in Safari
12	File delivery	Password can be set to blank
13	File delivery rule	In the selection tree of users etc. at the time of setting, the hierarchy of groups is displayed up to 3 levels
14	E-mail notification	Setting the path in the title of the email template does not replace it
15	PDF viewer	The search text box is hidden when the thumbnail appears on the left side
16	File viewing	Cannot preview from shortcut
17	Public space	PDF file is not displayed correctly when viewed with online viewer of mobile browser
18	Smart rule	If the conversion error occurs, you cannot operate (delete, move, copy, etc.) the original file in the space where PDF conversion does not leave the original file.
19	Disc space limit	Cannot set "Archive" notification
20	Disc space limit	The upper limit size of 9999GB is not enough
21	System authority management	Even if you save the file share as administrator authority in the available menu, it will be displayed as user authority at the next display
22	Workflow	The view doesn't work as expected
23	Department / Position	If you click "Use this organizational system" in LightNavi, LightNavi will be left unselected.
24	Specify login destination	If you press the OK button multiple times when saving the settings, multiple files will be created.
25	IP address connection management	After logging in from the permitted IP, you can use it as is even if you switch NW and connect from outside the permitted IP
26	User management	The number of remaining licenses returned by the user activation API called from SF is incorrect. The remaining number held in SF is shifted and user activation is not possible

Bug Fixes

No	Functions	Fixes
27	Group management	When editing a group managed by a group administrator, if you try to add a group from the Add button, the group is not displayed in the initial display.
28	Setting	I do not know that an error has occurred in validating the input of another tab when clicking OK on the registration / edit screen of department post etc.
29	Related list	When delivering from the related list of an opportunity, the main contact is not automatically set to the destination
30	Password zip	Extra space tree modal for apply space does not crawl
31	Mail template	If you set a password when delivering with a custom template, a password email will be sent with the default template even if you edit the template

Bug Fixes(OnlineEdit)

No	Functions	Fixes
1	ALL	Tab closes when reloading with F5 on Chrome 80
2	ALL	Editing does not end when you press the × button on the tab in Chrome 80
3	ALL	Saving a file with write password does not save
4	SpreadSheet	When you save a line by drawing a ruled line, download the file, and open the file, the ruled line may be cut off.
5	SpreadSheet	If you change the size of characters while inputting text, the size of the cell will not match the size of the input text box.
6	SpreadSheet	If there is a filter in which only white space is checked in the filter, a js error will occur
7	SpreadSheet	Different cell fill colors when pasted
8	SpreadSheet	If there is a column width setting of 30 columns or more, the drawing may collapse.
9	Spreadsheet	If you filter the date column of user-defined format, it will not be date filter
10	SpreadSheet	It is strange when pasting and saving a cell containing a common function
11	SpreadSheet	An Excel file that is different from the screen is downloaded when you fill and save in cells without styles in matrix cell units
12	SpreadSheet	When the line height is set to the default setting, the line height will change if only the ruled lines are drawn and saved.
13	Spreadsheet	Borders are not copied correctly when copying cells
14	Spreadsheet	When adding or changing a ruled line, the adjacent ruled lines of adjacent cells are incorrect.
15	SpreadSheet	Formatting, formula calculation, etc. may not be performed after Undo / Redo
16	Spreadsheet	Files may get corrupted if you unmerge the area containing the merged cells and then merge and save again
17	Slide	Images cropped on a high-resolution monitor are misaligned
18	Slide	The front and back of the figure may look different
19	Slide	Display of theme may be different
