Funtional Improve

No	Functions	Fixes
1	My information	When the terminal language is English and the local data is 0 KB, "Zero KB" is displayed.

Bug Fixes

No	Functions	Fixes
1	Upload	When selecting photos to allow the Fleekdrive mobile app on iOS14, the buttons are white and invisible
2	Upload	After selecting a photo to allow the Fleekdrive mobile app on iOS14, the selected photo is not immediately reflected on the upload image selection screen.
3	Specify login destination	I can't log in with "Login with Salesforce" on Fleekdrive Mobile when only Salesforce login is enabled
4	Device registration	If fleekdrive notification is turned off in the device settings, it will be registered as Unknown OS on the device management screen.
5	Delivery	The "delivery period" in the settings is displayed as "publication period" on Fleekdrive Mobile.
6	Delivery	It can be changed even if it is set to disable the change by the user in the file distribution setting> period.
7	Share	When adding a shared user, nothing happens when I press the x button at the top right of the access permission selection screen
8	Share	When adding a shared user, invalid users are also displayed and can be added without error
9	Favorite	For folders with no files directly underneath, the delivery button is inactive on the space operation screen, but it is active on the favorites screen.
10	Workflow	If you are an applicant and an approver, you can approve even if "Allow self-approval" is OFF
11	Space transition	The app crashes when I move to the deleted space
12	Property	If the space path is long, it will be omitted from the middle and you will not know the full path.
13	Space name	When displaying the space list, the space name, file name, and updater are displayed as sanitized.
14	My information	Symbols such as "<", ">", and "&" are displayed in a sanitized state.
