| 3   | Slide    | Improved speed of moving text objects with a large number of characters.   |

Bug Fixes

| No. | Function                | Detail  |
|-----|-------------------------|---|
| 1   | Files                   | In space sharing, if "Updated to adapt to the lower space" is enabled for a space with a large amount of lower space, shared users cannot be added.                               |
| 2   | Fies                    | "Share" section is not displayed in the query view configuration screen for users other than default System Administrator authority.  |
| 3   | Fies                    | Even if the space under My Space is shared with other than users (Group, Organization, Partner), it is not shared.  |
| 4   | Fies                    | In the list of search results, an error occurs when trying to move a file or space in a space below the space where the search was performed.                                     |
| 5   | File Viewer             | Fixed a bug that Space Top opens after login after the login page opens when accessing the URL of the file viewer when logging out.   |
| 6   | Move                    | When a space is moved from another space, a situation occurs in which there are multiple spaces with the same name that differ in uppercase and lowercase in the same space.      |
| 7   | Shared User             | When sharing My Space to a Group, the shared space is not displayed in the "Share" of My Space of the other party.  |
| 8   | Office Addin            | "Open with Office Addin" does not work under certain conditions such as the latest version of Firefox.  |
| 9   | Password ZIP            | ZIP file is corrupted if certain machine-dependent characters are included in the file name.  |
| 10  | Mail Notification       | If the comment field and address are displayed when uploading the file, it will be uploaded even if you press the cancel button, and an email will be sent.                       |
| 11  | Share Link              | A shared link notification email is also sent to users who are disabled in the group by specifying the delivery destination of the shared link.                                   |
| 12  | Share Link              | When the latest version is deleted for a version-controlled shared linked file, the latest version after deletion is not downloaded.  |
| 13  | Public Space            | If set the range during the published period, cannot change it to "greater than or equal to" or "less than or equal to".  |
| 14  | Delivery Address Book   | It is possible for anyone other than the user who created the user information registered in the delivery address book to edit it, too.   |
| 15  | Audit Policy            | Email notification and DataBase registration are not possible for user lock violations.   |
| 16  | Take over My Space      | User ID is not given to the name of the space inherited when the imported user is invalidated.  |
| 17  | User Management         | If select all of the list or narrow down the user list to one and then edit the user, a script error will be displayed when you press the "OK" button.                            |
| 18  | Usage                   | In the transition of monthly and yearly usage, the capacity of each space displayed when the mouse cursor hits is displayed for any month even if the cursor is away.             |
| 19  | Display Item            | When editing the display of setting items, "Descending" of the first sort and the second sort cannot be selected.   |
| 20  | Custom Item             | When adding a space or user, the list displayed after canceling or saving is automatically selected as the top file.  |
| 21  | Custom Item             | If enter the correct value from the wrong value in the custom item of the space or file property and press the OK button, the error message disappears, but the red line remains. |
| 22  | Fleekdrive Related List | When specify the gallery or cover flow display in the Fleekdrive Related List, "There is no image to display." will be displayed.   |
| 23  | API                     | "SpaceIdGetByPath.json" API extracts deleted space from Trash when searching for space from path.   |

## Bug Fixes(OnlineEdit)

| No. | Function    | Detail   |
|-----|-------------|--|
| 1   | Online Edit | Even if save files, the version may not be upgraded.   |
| 2   | Online Edit | Editing and file chat cannot be used at the same time.   |
| 3   | Document    | May not be displayed in IE11.  |
| 4   | Document    | The display is different between workflow reference and normal reference.  |
| 5   | Document    | Line pitches are displayed differently.  |
| 6   | Slide       | If the rotation angle of the connector figure is negative, a display error will occur.                                     |
| 7   | Slide       | Edit the text of the placeholder reference figure and return when the text is confirmed even without the bullet character. |
| 8   | Slide       | HTML of text works when editing graphic text.  |
| 9   | SpreadSheet | Get a corruption error when I move and save a textbox that doesn't have a style.   |
| 10  | SpreadSheet | If the cell data is in rich text format, it will not be reflected even if edited.  |
| 11  | SpreadSheet | Blank cannot be selected if blank is selected in the Validation rules.   |
| 12  | SpreadSheet | If the screen magnification is not 100% according to the input rule, the pull-down position will shift.                    |
| 13  | SpreadSheet | Shapes that exist in a fixed area are not displayed.   |
| 14  | SpreadSheet | The screen display does not change even if you undo after changing the format.   |
