No.	Function	Detail
-1	Salesforce	[Related List] When the distribution screen is launched, the e-mail address of the person responsible for the business partner should be set as the
1	Salesiorce	default address for the recipient.
2	Recycle Bin	[Trash] [Customize Display Items] "Delete Date" cannot be added to display items.
3	Organization Settings	Display "Audit OP" in the "Settings>Organizational Settings>License Options" field.
4	Electronic Book Preservation Method Option	[Auto Receipt] Receive files automatically when they are accepted.
5	Electronic Book Preservation Method Option	[Receiving] When there are too many files in the SQS registration, make them to be registered in installments.
6	Electronic Book Preservation Method Option	[Deleting] If a space is accidentally created in the storage space, makethem to be able to delete it.
7	Electronic Book Preservation Method Option	[Custom Items] Llimit the number of custom items for the Electronic book preservation method option.
8	Electronic Book Preservation Method Option	[Preview] View multiple pages of files on the preview screen of the Electronic book preservation method option.
9	File Sharing	Error messages to be displayed when there is an upload error.
10	List View	[List View] Only "Match next value" can be selected for extension search.
11	Fleekdrive Desktop	[Log output function] When an API call is made from FDD client and an HTTP status other than 200 is returned, make them to be able to pick up
11	Trieekurive Desktop	the HTTP status and output it to the log.
12	2 Fleekdrive Desktop	When 2-step authentication is set to be used in FD's security settings, make it possible to perform 2-step authentication in FDD's default settings as
12	Treekurive Desktop	well.
	Fleekdrive Desktop	When a space is moved on the server side, if the target space for the move cannot be referenced at the time of downstream synchronization, it is
13		uniformly classified as a normal space deletion. If the deletion target includes a locally configured sync space, it should be treated as a "sync space
		or its parent deletion"."
14	Fleekdrive Desktop	Replace APIs that are in danger of timing out with other logic.
15	Fleekdrive Desktop	Sync failures (sync_falled) and conflicts during upstream sync do not update the sync_status of the parent folder
16	Fleekdrive Desktop	If local ecm_id is empty when resolving a conflict (discard local changes), the file is deleted and the process ends.
10		If local changes are discarded as conflict resolution, change so that files are downloaded on the server side.
17	Fleekdrive Desktop	The socket operation could not be performed because there is not enough buffer space on the system or the queue is full. error and cannot
17	rieekurive Desktop	synchronize.
18	Fleekdrive File Server	Import the contents of the FDD ticket correspondence to the file server
19	Migration Tools	Update the modules of the migration tool (Python2 to Python3)
20	Migration Tools	Enable EV code signing in the migration tool installer.
21	Migration Tools	Migration tool to be TLS1.2 compliant.
22	Migration Tools	Support the creation of migration tool installers on PCs running the latest operating systems.

API, User Management   purposes, an error occurs in the API.	No.	Function	Detail
Space IDs can be set for space sharers in the API.	1	Delivery Management	[Delivery] Mails may not be tagged when autocomplete is pressed with the mouse.
4 APT Behavior when deleting spaces between spaces created from the web screen and spaces upleaded with a hierarchy is different.  5 APT Group sharing is accidentally available from the APT for sharing settings under MySpace.  6 APT Errors occur without User-Agent mull check.  7 APT, User Management When a user who does not have the system authority "User Management" executes the [User Information Registration/Update APT] for registratio purposes, an error occurs in the APT.  8 Salesforce [MySpace] [Public Space] Ownership cannot be transferred when the system administrator revokes reference privileges.  9 Salesforce [File Distribution] Individual distribution capacity delivered by File Distribution is not counted correctly.  10 Salesforce [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  11 Salesforce [File List] Shortcuts are not displayed when a lifecycle or smart rule is set on the list.  12 Salesforce [Related Ust] [Allery Loading does not stop when the gallery is displayed.  13 Salesforce [Related Ust] After changing the display to Gallery/Coverflow, file search does not work.  14 Salesforce [Workflow] Unable to "Withdraw" a workflow only from the Light Navigator.  15 Salesforce Salesforce Organization Dashboard shows organizations that were created in the past as a target for selection.  16 Salesforce System permissions are not reflected even if changed in the FDSF settings menu.  17 Salesforce Sideri' in "My Space Usage" and "File Distribution Usage" are not displayed correctly on the "User Information" screen in Salesforce.  19 Favorite Layout is corrupted when browser size is changed.  10 Favorite Layout is corrupted when browser size is changed.  11 Salesforce When moving or copying, the tree is based on the space that was referenced before opening the favorite.  22 Favorite, Tag Close button does not return to previous page.  23 Sharing Links When a video with a capital letter extension is opened with a shared link, it is displayed as an image.  When trying to set an auto	2	Multi-Factor Authentication	[Login] Certain users cannot log in when 2-step verification is set.
SAPI Group sharing is accidentally available from the API for sharing settings under MySpace.  API, User Management When a user who does not have the system authority "User Management" executes the [User Information Registration/Update API] for registration purposes, an error occurs in the API.  API, User Management When a user who does not have the system authority "User Management" executes the [User Information Registration/Update API] for registration purposes, an error occurs in the API.  MySpace] [Public Space] Ownership cannot be transferred when the system administrator revokes reference privileges.  Salesforce [File Distribution] Individual distribution capacity delivered by File Distribution is not counted correctly.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Gallery] Loading does not stop when the gallery is displayed.  [Related Ust] [Arc draining a property of the gallery is displayed.  [Related Ust] [Arc draining a property of the gallery of the	3	API	Space IDs can be set for space sharers in the API.
6 API Errors occur without User-Agent null check.  7 API, User Management When a user who does not have the system authority "User Management" executes the [User Information Registration/Update API] for registratic purposes, an error occurs in the API.  8 Salesforce [MySpace] [Public Space] Ownership cannot be transferred when the system administrator revokes reference privileges.  9 Salesforce [File Distribution] Individual distribution capacity delivered by File Distribution is not counted correctly.  10 Salesforce [Related List] [Gallery] Loading does not stop when the gallery is displayed.  11 Salesforce [File List] Shortcuts are not displayed when a lifecycle or smart rule is set on the list.  12 Salesforce [Related List] Infer hanging the display to Gallery/Coverflow, file search does not work.  13 Salesforce [Workflow] Unable to "Withdraw" a workflow only from the Light Navigator.  14 Salesforce [Workflow] Unable to "Withdraw" a workflow only from the Light Navigator.  15 Salesforce Salesforce Organization Dashboard Shows organizations that were created in the past as a target for selection.  15 Salesforce System permissions are not reflected even if changed in the FDSF settings menu.  17 Salesforce "Silder" in "My Space Usage" and "File Distribution Usage" are not displayed correctly on the "User Information" screen in Salesforce.  18 Ipolaed Extension Restrictions "Upload Extension Restrictions" does not work on the set space.  19 Favorite User Information are not work on the set space.  20 Favorite, Tag Close button does not return to previous page.  21 Favorite When moving or copying, the tree is based on the space that was referenced before opening the favorite.  22 Favorite, Tag Close button does not return to previous page.  23 Sharing Links When a video with a capital letter extension is opened with a shared link, it is displayed as an image.  24 Sharing Links When a video with a capital letter extension is opened with a shared link, it is displayed as an image.  25 Public Space Settings When sha	4	API	Behavior when deleting spaces between spaces created from the web screen and spaces uploaded with a hierarchy is different.

30 Recycle Bin entire folder is recovered. 31 Recycle Bin When only files are deleted, they are not displayed in the trash.	29	Public Space Settings	When repeatedly reloading the screen, deletion is rarely displayed in the light navigator.
entire folder is recovered.  31 Recycle Bin  When only files are deleted, they are not displayed in the trash.	20	Dominio Bin	When there are multiple files with the same name in the trash, multiple files with the same name are created at the recovery destination when the
	30	Recycle Bin	entire folder is recovered.
32 Thumbnail When checking thumbnails after uploading, only a portion of the image is generated.	31	Recycle Bin	When only files are deleted, they are not displayed in the trash.
	32	Thumbnail	When checking thumbnails after uploading, only a portion of the image is generated.

No.	Function	Detail
33	Smart Rules	Smart rules sometimes do not fire.
34	Tag	When navigating from the tag list, the screen does not finish reloading.
35	Tag	After copying a file from the tag list, the tree on the left side is not displayed.
36	Check in	When a space name contains "Single Cotation", the check-in dialog is not displayed because the escape processing is not done.
		[Performance] Response is slow and the tree is not displayed.
38	Electronic Book Preservation Meth	Files in receipt can be overwritten and saved.
39	Electronic Book Preservation Meth	Email related to Electronic Book Preservation Method Option URLs are not being set correctly.
40	Electronic Book Preservation Meth	When the Electronic Book Preservation Method Option is enabled, some trees are displayed as the receiving administrator when the administrator
70	LIECTIONIC BOOK PIESEI VALION MELI	authority of the collaborating company is determined.
		The light menu of the application is displayed in the public space.
		The "Failed File Name" is not displayed in the e-mail when the receipt is failed.
43	Electronic Book Preservation Meth	The default permissions for the Electronic Book Preservation Method Option cannot be changed.
44	Electronic Book Preservation Meth	Bugs related to the custom item "Selection List (Multiple Selection)" in "Registration of Attribute Items" of the Electronic Book Preservation Method.
45	Electronic Book Preservation Meth	The display control of "Settings > Electronic Book Preservation Method" was not sufficiently controlled.
46	Electronic Book Preservation Meth	There is no way to apply for the Electronic Book Preservation Method on the mobile version.
47	IFIectronic Book Preservation Meth	Improvement of the problem that "Email Notification by Receipt Rule" in "Email Notification Based on Email Notification Settings" is not sent when a
		batch receipt is received.
		Private contacts cannot be added to a private contact group when importing private contacts.
	Delivery Management	Language of delivery period is not correct (English is displayed when Chinese, Spanish, or Portuguese is displayed).
	Delivery Management	The upper limit for the number of downloads during distribution differs depending on the input screen.
	Reset password	Users are able to reset their passwords even though they are not allowed to do so themselves.
	· · · · · · · · · · · · · · · · · · ·	Special characters are sometimes included in the file/space name.
		When a file search is performed in the gallery (cover flow) view, the layout is corrupted in the results display.
		File search results are ignored when switching to "Gallery View" on the file search results screen.
		When deleting a file, the message "There may be changes that have not been updated. may be displayed when deleting a file.
		After deleting a file from the light menu, a failure message is displayed when deleting another file.
57	Edit Properties	File and space properties may not be saved after changing them by direct input.
58	Mail Notification	After uploading a file, canceling the mail notification, and then uploading the file again, the name of the deleted file is listed in the mail notification.
59	Mail Notification	When a user is added to a group that is not configured for mail notification, only the added user is notified by mail.
60	User Management	[CSV Import] Some users cannot be assigned to a specified group.
61	User Management	Basic information of departments and positions are updated by the updater "CloudSharedOffice".
62	List View	Checkboxes are not misaligned when the magnification of the browser is less than 100%.
63	Usage	The amount of delivery usage is different between [Usage Status] "Delivery Usage" and [User Management] > "File Delivery Usage" in the "Edit" section.

No.	Function	Detail
64	Workflow	Please improve the specification that "Add file by dragging" cannot be used when applying for WF from the search result screen.
65	Workflow	In the "Category" of the workflow setting in the administrator menu, the spin button "Add User" leaves the background white.
66	Workflow	When selecting "Group" in "New Workflow Definition" and "Route Information", the display is corrupted.
67	Workflow	Disabled accounts that have been in the flow in the past can be selected as comment notifiers.
68	Workflow	Some workflow definitions are not displayed in the settings menu.
69	Evidence	When there are more than 100,000 spaces, filtering the trails by spaces could not be work.
70	Fleekdrive Mobile	[iOS] Xcode15 support
71	Fleekdrive Mobile	[Android] SDK Version Upgrade Support
72	Fleekdrive Mobile	Application cannot be submitted from mobile devices due to specification changes in the Electronic Book Preservation Method Option.
73	Fleekdrive Mobile	Application crashes when tapping the PDF screen.
74	Fleekdrive Mobile	Page transition occurs when trying to zoom in while viewing PDF.
	Fleekdrive Mobile	Trail is not recorded when logging out of Android.
76	Fleekdrive Desktop	Response to the change in the Apple notarization method effective November 1, 2023.
77	Fleekdrive Desktop	When the name of the space to be moved and the name of the space on the server side are different, the components will proliferate.
78	Fleekdrive Desktop	There is a problem with the behavior when a space is added and renamed on the server side from Clear Queue to Download by Re-add Folder
	•	Queue.
79	Fleekdrive Desktop	[Proxy Settings] "Socks4" and "Socks5" can be set as the proxy type in the proxy settings, but cannot connect.
80	Fleekdrive Desktop	Action on login IP address restriction
81	Fleekdrive Desktop	Correct updating contents of file attribute information when uploading files in upstream synchronization
	Fleekdrive Desktop	When a space is moved by API for FDD, the path modification layer under the space is not updated.
		After setting a sync space in "Administration > Sync Space", the space does not disappear immediately after "Delete or Archive".
84	Fleekdrive Desktop	If the paths before and after the move are the same in the synchronization space or its parent move queue, the target of the move is deleted.
85	Fleekdrive Desktop	Deletion decision of the last upper level of processing is different in the synchronous space or its parent move queue and in the synchronous space
		or its parent delete queue.
	-	Checking authorized spaces in the local "Fleekdrive Desktop Settings > Synchronization Settings" tree may no longer work
87	Fleekdrive Desktop	When selecting [Reflect to Fleekdrive] for a file that has a conflict, the local version of the file is left behind.
	Fleekdrive Desktop	Update fails if there is a space in the Windows user name.
89		Right-click menu "Reflect to Fleekdrive" may cause an error, and the process may be interrupted (without affecting other processes).
90	Fleekdrive Desktop	When a folder under a folder set as a synchronizable space on the server is set as a target space for synchronization in FDD, and the target space is
		moved to a folder not set as a synchronizable space on the server side, the move is treated as a move of the synchronization space.
	·	Synchronization spaces that can be set in "Administration > Synchronization Spaces" may be set under a synchronization space.
92	-	When a queue is passed during manual synchronization, an error occurs.
93	Thleekdrive Desktop	If a folder or file is moved locally and the upstream synchronization of the move fails, an additional upstream synchronization will be performed after
		the upstream synchronization of the deletion.
	•	When some characters are used in a path, the extension is no longer valid for that path.
95	Fleekdrive Desktop	[MacOS] FDD for Mac OS can be updated by overwrite installation, however the version held in the FD is not updated.

No.	Function	Detail
96	Fleekdrive Desktop	When local changes are discarded for a space with conflicting files, the icons of the conflicting files remain conflicted.
97	Fleekdrive Desktop	When a merge is performed on a folder, the API is called to get information about the version file, and retries until the retry limit is reached.
98	Fleekdrive Desktop	When synchronization method is downlink only, uplink thread may terminate on communication error
99	Fleekdrive Desktop	When merging a space, the status may not be updated correctly if the space under the file is empty.
100	Fleekdrive Desktop	When moving files using the API for FDD, the lifecycle organization and space settings are not reflected.
101	Fleekdrive Desktop	When moving files downstream, timestamps are not updated because there is no local process to update the source timestamp and destination timestamp.
102	Fleekdrive Desktop	When an error occurs in downstream synchronization due to the inclusion of control characters, the local synchronization history cannot be opened.
103	Fleekdrive Desktop	After copying a folder (with files) locally to the same path as the source folder, when the source folder is renamed or moved, the destination file conflicts.
104	Fleekdrive Desktop	If a folder containing files or folders is deleted locally, and after the deletion is up-synchronized, the folder two levels up is moved or renamed, and then deleted, the up-synchronization of the deletion fails.
105	Fleekdrive Desktop	After switching the language from the task menu, the confirmation button in the dialog opened from the task menu remains in the original language.
106	Fleekdrive Desktop	When renaming a file on the local and server at the same time, the file names on the local and server do not match.
