Bug Fixes

No.	Function	Detail
1	Salesforce	Unable to send e-mail to some users selected from address book in public space.
2	Display Items	Number of items displayed may not be counted correctly.
3	Electronic Book Preservation Method Option	In the API for accepting receipt requests, it is sometimes possible for a non-receiving administrator to accept the request.
4	Electronic Book Preservation Method Option	Changing the space name of a space set as a sorting rule condition is not reflected in the sorting rule.
5	Evidence	Viewing text does not leave a trail when access privileges are other than [Viewer]. No [Web Text Reference] in search actions for trails.
6	User Setting	Timeout occurs when exporting users with a large number of users.
7	Salesforce	API timeout occurs when there are too many shared spaces to reflect when synchronizing groups.
