Release Note

Fleekdrive

Functional Improve

No.	Function	Detail
1	File Sharing	When moving (copying), improve permission checks.
2	File Sharing	When deleting a file/space from the trash, the original space's updater information is not updated.
3	Standard Search	Improved space/content search.
4	Delivery	Added the ability to specify comments when applying for a workflow based on a file distribution rule.
5	Generation AI	Allowed the current space to be selected by default in the tree in the summary file output destination selection modal.
6	Multi-factor Authentication	Allowed administrators to set the default two-step authentication selection.
7	Settings	Unified display strings on the API usage settings screen.
8	Electronic Books Preservation Act	Allowed standard system administrators to perform operations in accordance with the Electronic Bookkeeping Act.
9	Electronic Books Preservation Act	Added standard recipient permissions.

Bug Fixes

No.	Function	Detail
1	File Sharing	It may not be possible to start editing Excel files with a password-protected access.
2	File Sharing	Performance improvements on the Office editing server.
3	File Sharing	When sharing files with the [Everyone] group under a company space, community license users also receive various notification emails.
4	File Sharing	Sorting behavior across multiple pages in archive spaces may be incorrect.
5	File Sharing	An error occurs if the API call interval between file registration and editing web publishing settings is very short.
6	Office Edit	When editing Excel online, edits are not reflected correctly in certain patterns.
7	SSO Setting	SSO single sign-out settings may redirect to an invalid URL.
8	Fleekdrive Desktop	The [View on Fleekdrive] link in Explorer may be invalid.
9	Salesforce	Disk capacity and other thresholds are not reflected when registering a new user.
10	Salesforce	The notification list appears empty when the "Enter notification message" dialog for smart rule email notifications is displayed.
